**REGIONAL DISTRICT OF NANAIMO
MINUTES OF THE AGRICULTURAL ADVISORY COMMITTEE MEETING**

**Friday, December 7, 2018
2:00 P.M.
Board Chambers**

In Attendance:	Director M. Young	Chair
	Director S. McLean	Electoral Area H
	Director J. Turley	City of Nanaimo
	J. Thony	Regional Agricultural Organization
	M. Ryn	Regional Agricultural Organization
	K. Reid	Shellfish Aquaculture Organization
	G. Laird	Representative District 68
	R. Thompson	Representative District 69
	C. Watson	Representative District 69
Also in Attendance:	Director B. Rogers	Electoral Area E
	P. Thompson	Mgr. Current Planning
	K. Cramer	Parks Planner
	K. Hamilton	Administrative Assistant, Strategic & Community Development

CALL TO ORDER

The Chair called the meeting to order and respectfully acknowledged the Coast Salish Nations on whose traditional territory the meeting took place.

APPROVAL OF THE AGENDA

It was moved and seconded that the agenda be approved as presented.

CARRIED UNANIMOUSLY

ADOPTION OF MINUTES

Agricultural Advisory Committee Meeting - September 21, 2018

It was moved and seconded that the minutes of the Agricultural Advisory Committee meeting held September 21, 2018, be adopted.

CARRIED UNANIMOUSLY

REPORTS

Request for Comment on Non-Farm Use in the Agricultural Reserve Application No. PL2018-155 - 3734 Jingle Pot Road, Electoral Area C

This land was donated to the RDN by Anders & Dorrit Olesen as a gift. Kelsey Cramer spoke to the Committee about the intent of the use of the property and the direction of the previous owner's wishes that the land remains an informal park. The proposed improvements are for parking and a small gathering area.

It was moved and seconded that no comment be provided on Non-Farm Use in the Agricultural Land Reserve Application No. PL2018-155 - 3734 Jingle Pot Road, Electoral Area C.

Opposed (2) J. Thony and M. Ryn

CARRIED

Request for Comment on Non-Farm Use in the Agricultural Reserve Application No. PL2018-146 - 3106 Northwest Bay Road, Electoral Area E

Will Gemmell, applicant, spoke on the farm use and proposed agricultural development.

It was moved and seconded that the application for Non-farm Use in the Agricultural Land Reserve Application No. PL2018-146 – 3106 Northwest Bay Road, Electoral Area E, be forwarded to the Agricultural Land Commission with a recommendation to approve.

Opposed (2) C. Watson and R. Thompson

CARRIED

Non-Farm Use in the Agricultural Reserve Application No. PL2018-144 - 1330 and 1410 Hodges Road, Electoral Area G

It was moved and seconded that the application for Non-Farm Use in the Agricultural Land Reserve Application No. PL2018-144 - 1330 and 1410 Hodges Road, Electoral G, be forwarded to the Agricultural Land Commission with a recommendation to approve.

CARRIED UNANIMOUSLY

Agricultural Land Commission Final Decisions Chart

Staff provided an update on the status of ALC decisions since the last meeting on September 21, 2018.

NEW BUSINESS

Gathering For Events Brochure Update

It was moved and seconded that the Committee recommend that Regional District of Nanaimo staff and Directors look into Special Events permits for smaller events than 500 people that would apply to gathering for events in the Agricultural Land Reserve.

Opposed (1): K. Reid

CARRIED

ADJOURNMENT

It was moved and seconded that the meeting be adjourned.

TIME ADJOURNED: 4:24 PM

CARRIED UNANIMOUSLY

Planner **FILE:** PL2019-007

SUBJECT: Request for Comment on Subdivision in the Agricultural Reserve
Application No. PL2019-007
2452 Hemer Road – Electoral Area A
Section 14, Range 2, Cedar District, Except the Westerly 60 acres Thereof,
and Except Parcel B (DD 6974N) of Said Section

SUMMARY

This is an application for subdivision in the Agricultural Land Reserve (ALR) to allow a two lot subdivision on a 14 hectare parcel located in Electoral Area A. Should the Agricultural Advisory Committee (AAC) wish to provide comments to the Provincial Agricultural Land Commission (ALC), it may do so by considering the adoption of a motion. Any comments provided by the Committee will be provided to the ALC, along with a copy of this report to assist the ALC in making a decision on this application.

BACKGROUND

The Regional District of Nanaimo (RDN) has received an application for subdivision in the ALR from Rhonda Kulai the property owner, on behalf of additional family members on title. The subject property is legally described as Section 14, Range 2, Cedar District, Except the Westerly 60 acres Thereof, and Except Parcel B (DD 6974N) of Said Section. The civic address is 1813 Rugg Road and 2452 and 2448 Hemer Road. The subject property is approximately 14 hectares in area and is located entirely within the ALR. The parcel is bound by Rugg Road and Agriculture 1 (AG1) zoned lots within the ALR to the north, Hemer Road and Residential 2 (RS2) zoned lots to the west, Crown land (Hemer Provincial Park) to the south and Holden Corso Lake and a large Agriculture 1 (AG1) zoned lot, half within the ALR, to the east.

The property is bisected by the Morden Colliery Regional Trail. This multi-use trail currently connects Hemer Provincial Park and Cedar Road with future plans to connect to Morden Colliery Historic Provincial Park. The property currently contains two dwelling units, barn, shop and accessory buildings (see Attachments 1 and 2 for Subject Property Map and Aerial Photo). The property is also bisected by Holden Lake as wetlands at the north end of the lake extend past the north boundary of the subject property.

The property owners applied for a non-farm use to permit the construction of a second dwelling unit (log cabin) in 2009. In addition to the non-farm use, the applicants also requested to subdivide the subject property in the same application. The ALC resolution (# 1050/2009) dated October 15, 2009 approved the second dwelling but did not approve the subdivision.

The property owners applied again for subdivision in the ALR in 2011. This proposal was to separate the lot into two parts separated by the Morden Colliery Provincial Trail. The ALC resolution (#127/2012) dated April 3, 2012 refused the application.

A copy of the applicant's submission package is included as Attachment 10. Personal Information is redacted in accordance with the *Freedom of Information and Protection of Privacy Act*.

Agricultural Advisory Committee members were provided an opportunity to attend the site on February 6, 2019.

REGIONAL GROWTH STRATEGY

The subject property is currently designated 'Resource Lands and Open Space' pursuant to the "Regional District of Nanaimo Regional Growth Strategy Bylaw No. 1615, 2011" (RGS). The policies of this designation do not support the creation of new parcels that are smaller than the size supported by the official community plan in effect at the date of the adoption of the RGS (see Attachment 7). Further to this, the RGS encourages the provincial government to protect and preserve the agricultural land base through the ALR (see Attachments 8 and 9).

A copy of the applicant's submission package is included in Attachment 10.

OFFICIAL COMMUNITY PLAN

The subject property is currently designated as 'Agricultural' pursuant to the "Regional District of Nanaimo Electoral Area 'A' Official Community Plan Bylaw No. 1620, 2011" (see Attachment 6). The policies of this designation do not support subdivision of land within the ALR which does not result in a net benefit to agricultural production as determined by a qualified professional. In addition, the 'Agricultural' designation supports a minimum parcel size of 8.0 hectares for lands within the ALR.

The parcel is also designated within the Eagle and Heron Nesting Trees and Freshwater and Fish Habitat Protection Development Permit Areas. A development permit may be required prior to any subdivision or alteration of the land.

Amendments to "Regional District of Nanaimo Electoral Area 'A' Official Community Plan Bylaw No. 1620, 2011" are not required.

ZONING

The parcel is currently zoned Agriculture 1 (AG1), Subdivision District 'D', pursuant to "Regional District of Nanaimo Land Use and Subdivision Bylaw No. 500, 1987" (Bylaw 500). The AG1 Zone permits Farm Use, Agriculture, Residential Use, home based business, Secondary Suite, Temporary Sawmill, Agricultural Education and Research, Agri-tourism Accommodation, Production of Biological Integrated Pest Management Products, Gathering for an Event and allows 2 dwelling units on parcels greater than 2.0 ha in area.

The applicants propose to create two fee simple lots. The lots are proposed to be separated by the natural boundary of the Morden Colliery Regional Trail into approximately one 8.0 hectare Lot and one 6.8 hectare lot. (See Attachment 3 – Proposed Plan of Subdivision).

Amendments to Bylaw 500 would not be required.

BOARD POLICY AND AAC PROCEDURE

Regional District of Nanaimo “Board Policy B1.8: Review of ALR Applications” (Board Policy B1.8) provides an opportunity for the AAC to review and provide comments on ALR applications for exclusion, subdivision and non-farm use, on lands within the ALR. Board Policy B1.8 also includes a standing Board resolution for subdivision of lands within the ALR which reads as follows:

As outlined in the Regional Growth Strategy, the Regional District of Nanaimo fully supports the mandate of the Agricultural Land Commission (ALC) and the preservation of land within the Agricultural Land Reserve (ALR) for agricultural use. The Regional District encourages the ALC to only consider subdivision where in the opinion of the ALC the proposal will not negatively impact the agricultural use of the land or adjacent ALR lands.

In accordance with the AAC Terms of Reference, the role of the AAC members is to provide local perspective and expertise to advise the Board (and in this case comment to the ALC) on a range of agricultural issues on an ongoing and as needed basis, as directed by the Board. In addition to members’ local knowledge and input, comment on ALR applications may be guided by Board approved policies such as the RDN AAC, the Board Strategic Plan, the RGS and the applicable OCP along with the relevant land use bylaws. Members of the AAC can also find information related to ALR land use and agriculture in BC, on the Agricultural Land Commission and Ministry of Agriculture websites. Local and contextual information can also be found on the RDN’s agricultural projects website at www.growingourfuture.ca.

Comment provided to the ALC from the AAC is consensus based, through Committee adoption of a motion. If an AAC member has comments regarding an application being submitted to the ALC, the appropriate time to provide those comments is in the Committee meeting, during discussion on the application, and prior to the Committee’s adoption of its motion. Only motions approved by the Committee will be forwarded to the ALC for its consideration. Comments from individual AAC members will not be included in the staff report that is forwarded to the ALC.

The comment provided by the AAC is not an approval or denial of the application and is only a recommendation to the ALC regarding a specific application. As per Board Policy B1.8 any comment from the AAC is provided in addition to the applicable standing Board resolution and Electoral Area Director’s comment (if provided). The ALC is the authority for decisions on matters related to the ALR and will consider comments in making its decision on an application.

ELECTORAL AREA DIRECTOR COMMENT

As per Board Policy B1.8, all applications under the *Agriculture Land Commission Act* for exclusion, subdivision, or non-farm use of ALR land are to be forwarded to the applicable subject property's electoral area director, for comment.

With respect to this application, Electoral Area A, Director Keith Wilson has provided the following comments:

As the Regional District of Nanaimo Director for Area A, I support this application to the ALC as it is apparent that the regional trail bisecting this property (and not allowing travel over it from one parcel to the other) as well as the geography of the property make it such that the agricultural potential for the land is not lessened by the proposed separation into two lots. In fact, it makes agricultural pursuits on either lot more attractive if the parcels are separated as access, proximity to farm buildings and difference in topography may become less of a factor on each lot.

Comments of Electoral Area 'A' Director Keith Wilson will be provided to the ALC, as included with this report.

AGRICULTURE 1 continued

- | | |
|---|-------|
| d) Notwithstanding subsection (c), on a parcel located in this zone and created prior to February 22, 2011 and having an area greater than 2.0 ha. | 2 |
| 3) Height (non-farm and accessory farm buildings and structures) | 9.0 m |
| 4) Parcel coverage | |
| a) Non-farm buildings and structures | 10% |
| b) Farm or agriculture buildings and structures | 25% |
| c) Greenhouses | 75% |
| d) In no case shall the combined parcel coverage exceed 75%. | |
| e) Notwithstanding a), b), c) and d) above or any other regulation in this Bylaw, the following agricultural structures shall be exempt from maximum parcel coverage: | |
| i) Permeable detention ponds | |
| ii) Support structures used for shading, frost and wind protection, netting, or trellising. | |

3.4.1.3 Minimum Setback Requirements

- | | |
|--|-------|
| 1) All non-farm buildings and structures – All lot lines | 8.0 m |
| except where: | |
| a) the parcel is less than 4000 m ² in area then the setback from lot lines may be reduced to 2.0 m from an interior side lot line and to 5.0 m from other lot lines, excluding the front lot line; | |
| b) any part of a parcel is adjacent to or contains a watercourse or the sea then the regulations in Sections 3.3.8 and 3.3.9 shall apply. | |
| 2) All agriculture or farm buildings, structures and uses – in accordance with Section 3.3.10. | |

3.4.1.4 Other Regulations

- 1) For any part of a parcel in the Agricultural Land Reserve, 'Farm Use' shall be a permitted principal use and for any part of a parcel not located in the Agricultural Land Reserve, 'Agriculture' shall be a permitted principal use.
- 2) Accessory Farm uses are only permitted on that part of a parcel that is within the Agricultural Land Reserve.
- 3) Specific 'Farm' and 'Permitted' uses as defined in the *Agricultural Land Reserve Use, Subdivision, and Procedure Regulation* shall be developed in accordance with Section 3.3.15 and 3.3.16 of this Bylaw.
- 4) Despite any regulation in this Bylaw, land established as "Agricultural Land Reserve" pursuant to the *Agricultural Land Commission Act* is subject to the *Agricultural Land Commission Act* and *Regulations*, and applicable orders of the Land Reserve Commission.

(Page 2 of 6)

Food Security

Much of the produce eaten in British Columbia comes from distant lands. Many of these areas are experiencing an increase in severe weather events which are threatening crops and creating additional vulnerabilities and price fluctuations in the food system.

Climate Change Implications

Industrialized agriculture is a significant contributor to greenhouse gas emissions through deforestation, livestock production, application of chemical fertilizer and manure, and from the use of fossil fuels in the sowing, harvesting, processing and transport of agricultural products. Creating local food systems reduces the distance food must travel and as a result reduces greenhouse gas emissions and transport costs.

In addition to warmer average temperatures, climate change is expected to shift precipitation patterns and increase the frequency of severe weather events which may increase the risk of extreme drought and crop failure. Local food systems help mitigate the impacts of climate change by building resiliency into the system and becoming more self-reliant.

Food Accessibility

Access to fresh nutritious food is critical for maintaining a healthy population. All area residents should have access to affordable, fresh, nutritious, culturally appropriate food, which is locally produced. Access to healthy food can help combat rising rates of obesity and chronic illnesses that can be partially addressed by improvements to diet and exercise.

Strategic Direction and Goals

Section 5.0 helps achieve the Community Vision by contributing towards community Goals 1, 6, 7, 13, 15, 16, and 17. Please refer to Section 3.3 for a list of community goals.

5.1 Agricultural

The Agricultural Land Use designation applies to all land located in the Agricultural Land Reserve (ALR) at the date of adoption of this plan. These lands occupy approximately fifty-five percent of the plan area and are generally characterized by parcels, greater than 2.0 ha in area. Lands within the ALR are intended for agricultural production. These lands contribute to the economy and are of critical importance in helping Electoral Area 'A' become a leader in local food production.

Attachment 6 Official Community Plan Land Use Designation (Page 3 of 6)

Objectives and Policies

Section 5.1	Policy/Objective
Objective 5.1.1	Protect ALR land from non-agricultural development.
Policy 5.1.1	Lands within the Agricultural Lands designation are shown on Map No. 3.
Policy 5.1.2	Agriculture shall be the priority use on lands located within the Agricultural Lands designation.
Policy 5.1.3	Uses within this designation shall include agriculture and uses which are compatible with agriculture and contribute towards making it more productive.
Policy 5.1.4	Rezoning may be supported, subject to the approval of the Agricultural Land Commission to allow: <ul style="list-style-type: none"> a. Value added agricultural uses; b. 'Permitted use' as defined by the ALR, Subdivision and Procedure Regulation (BC Regulation 171-2002), as amended or replaced from time to time; or, c. Agricultural education and/or demonstration of agricultural technologies.
Policy 5.1.5	This plan supports the creation of an agricultural zone which applies to all lands within this designation.
Policy 5.1.6	Removal of lands from the ALR, which are capable of agricultural production, is considered contrary to the Community Vision and is not supported by this plan.
Policy 5.1.7	Subdivision of land within the ALR, which does not result in a net benefit to agricultural production as determined by a qualified professional, is considered contrary to the Community Vision and is not supported by this plan.
Policy 5.1.8	The RDN should consider providing comments to the Agricultural Land Commission on all applications for non-farm use, subdivision, and exclusion.
Policy 5.1.9	If land is removed from the ALR, the land should continue to be designated 'Agricultural Lands' and should not be considered for additional development potential.
Policy 5.1.10	This plan supports ongoing consultation with the Agricultural Advisory Committee, the Agricultural Land Commission, and the Provincial Ministry responsible for Agriculture to find ways to encourage agriculture and make it more productive.
Advocacy Policy 5.1.11	The RDN shall work with the MOTI to discourage the creation of new public roadways ending at lands located in the ALR to reduce the future demand for further non-agricultural development of ALR land.

Attachment 6
Official Community Plan Land Use Designation
(Page 4 of 6)

Implementation Actions	Timing (Immediate, Short Term, Long Term, Ongoing)
Designate DPA's on land adjacent to the ALR to ensure adequate buffers are provided and to reduce the impacts of non-agricultural development on agricultural land.	Immediate
Work with the Agricultural Advisory Committee, the Ministry responsible for Agriculture, the Agricultural Land Commission, and the community to develop an agricultural zone and identify opportunities to increase diverse agricultural activity. Amend RDN Land Use and Subdivision Bylaw No. 500, 1987 to include the new zone.	Short Term
Review the current board policy on commenting on applications made to the Agricultural Land Commission and consider the potential role of the Agricultural Advisory Committee. Write a report to the Board with recommendations.	Short Term
Work with the Provincial subdivision approving officer, Ministry of Agriculture, and the Agricultural Land Commission to minimize the impact of subdivision on lands within the ALR.	Ongoing

Objective 5.1.2	Support and promote sustainable agriculture on ALR lands.
Policy 5.1.12	The minimum parcel size for lands located within the Agricultural Lands designation shall be 8.0 ha.
Policy 5.1.13	<p>Despite policy 5.1.12 above, subject to approval from the Agricultural Land Commission, and subject to being consistent with the RGS, the RDN may support the creation of more compact residential clusters through a rezoning or Development Variance Permit (DVP) on lands within this designation which may include smaller parcels and/or a subdivision pursuant to the Strata Property Act subject to the following:</p> <ol style="list-style-type: none"> The proposal must include a significant agricultural component which would contribute towards making Electoral Area 'A' a leader in local food production. The proposal does not result in more dwelling units and/or parcels than what is permitted by the zoning in place at the time the application is made. The overall density and/or number of parcels shall be determined based on the buildable area of the subject property and not the total site area as determined by the RDN. The proposal is consistent with ALR, Subdivision and Procedure Regulation (BC Regulation 171/2002). Residential development should be located on the least fertile portions of the subject property. Residential development must include a vegetated buffer designed and constructed in accordance with the Ministry of Agriculture "A Guide to Edge Planning Promoting Compatibility Along Urban-Agricultural Edges" published in 2009 by the Ministry of Agriculture as amended or replaced

Attachment 6
Official Community Plan Land Use Designation
(Page 5 of 6)

	<p>from time to time.</p> <p>f. No parcel of less than 1.0 ha shall be created.</p> <p>g. All development must be serviced with onsite methods for treating wastewater and water systems.</p> <p>h. The proposal includes a report from a professional Agrologist outlining how the proposal would be more efficient from an agricultural perspective than a traditional subdivision and certifying that the proposed residential development is located on the least fertile portions of the land and is necessary to support the proposed agricultural use.</p> <p>i. The remainder must be protected against further subdivision and non-agricultural uses through covenant and/or zoning.</p>
Policy 5.1.14	This plan supports the use of conservation covenants for the preservation of environmentally sensitive features. However, it is recognized that agricultural considerations must be taken fully into account when the use of a conservation covenant for the preservation of environmentally sensitive features is being contemplated.
Policy 5.1.15	This plan supports a feasibility study looking at the use of conservation covenants and transfer of development credits for the preservation of farm land.
Policy 5.1.16	Property owner initiated zoning to reduce subdivision and preserve large parcel of agricultural land is supported.
Policy 5.1.17	The use of agricultural practices which minimize the impacts on the environment, improve water use efficiency, reduce the use of chemical fertilizers, and reduce dependence on fossil fuels, such as permaculture, shall be encouraged.
5.1.18	The use of water for irrigation on agricultural lands to boost local food production is supported.

Implementation Actions	Timing (Immediate, Short Term, Long Term, Ongoing)
Conduct a public process for considering implementation of minimum parcel sizes.	Please refer to Appendix 3 for more information
Conduct a feasibility study looking at the use of conservation covenants and transfer of development credits for the preservation of farm land.	Short Term

Objective 5.1.3	Create opportunities for local food markets
Policy 5.1.19	This plan supports collaboration, cooperation, and flexibility to support agricultural operations looking at investing in agriculture and/or attempting to resolve issues which are limiting agricultural production in Area 'A'.
Policy 5.1.20	The RDN shall work with other levels of government and other agencies to develop financial incentives to preserve farm land and encourage young families to get in to farming.
Policy	This plan supports the use of public land for community gardens and farmers

Attachment 6
Official Community Plan Land Use Designation
(Page 6 of 6)

5.1.21	markets where appropriate.
Policy 5.1.22	Proposals for the establishment of a cold storage facility and provincially licensed meat processing facility may be supported within the plan area in consultation with the ministry responsible for Agriculture, Agricultural Land Commission, the farming community, and the community at large.

Implementation Actions	Timing (Immediate, Short Term, Long Term, Ongoing)
Work with the farming community and the Agricultural Advisory Committee to develop strategies which support and encourage agriculture in Electoral Area 'A'.	Ongoing
Amend 'RDN Land Use and Subdivision Bylaw No. 500, 1987' to permit community gardens and farmers markets. Develop a process for managing the use of these lands for community agriculture.	Short Term

Objective 5.1.4	Support and Encourage Agricultural Education.
Policy 5.1.23	This plan supports the preparation of an Agricultural Plan for Electoral Area 'A' which should at minimum provide an overview of the local food system, its relative food security, capacity, opportunities for enhancing the food-related economy, and recommendations for increasing the sustainability of the food system.
Policy 5.1.24	The RDN should provide perspective purchasers, developers, and land owners with information on living in rural agricultural communities.
Policy 5.1.25	The RDN should work with the Nanaimo and Cedar Farmers Institute, ministry responsible for Agriculture, RDN Advisory Committee, Agricultural Land Commission, Nanaimo Foodshare, and School District 68 to develop an agricultural education program aimed at elementary and high school students.

Implementation Actions	Timing (Immediate, Short Term, Long Term, Ongoing)
Prepare an agricultural plan which is consistent with the plan prepared for the Cowichan Valley Regional District.	Immediate
Develop informational brochures to distribute to prospective property owners as well as existing Area A residents.	Short Term
Work with the Agricultural Advisory Committee to establish an agricultural education program.	Short Term

Attachment 7

Regional Growth Strategy Land Use Designation

Resource Lands and Open Space

The Resource Lands and Open Space land use designation includes:

- Land that is primarily intended for resource uses such as agriculture, forestry, aggregate and other resource development; and
- Land that has been designated for long-term open space uses.

This designation includes:

- Land in the Agriculture Land Reserve;
- Crown land;
- Land designated for resource management or resource use purposes, including forestry, in official community plans;
- Recognized ecologically sensitive conservation areas;
- Provincial parks;
- Regional parks;
- Large community parks;
- Cemeteries;
- Existing public facilities outside of areas planned for mixed-use centre development;
- Destination Resorts; and
- Golf courses.

Resource activities on land in this designation should be encouraged to operate in ways that do not harm the functioning of natural ecosystems. Land use control, and resource management of lands in this designation is shared between landowners, local, provincial and sometimes federal government. Much of the forest land is privately owned. Forest companies, farmers, shellfish aquaculture (and associated research facilities) and aggregate resource development companies are recognized to have the right to operate on land within this designation in compliance with local, provincial and federal government regulations.

No new parcels that are smaller than the size supported by the official community plan in effect at the date of the adoption of this *Regional Growth Strategy* may be created on land in this designation.

Attachment 8
Regional Growth Strategy Goal 7 – Enhance Economic Resiliency - Agriculture

Agriculture

- 7.14 Recognize the importance of agriculture to the region's economy. To this end, the RDN and member municipalities agree to:
- Support the management of the Agriculture Land Reserve (ALR) by the provincial government;
 - Encourage the provincial government to protect the agricultural land base through the ALR;
 - Support the agricultural use of ALR lands within designated Urban Areas or Rural Village Areas except in instances where urban land uses have already been established at the time of the adoption of this RGS;
 - Recognize that all ALR lands will be subject to the regulations of the Agricultural Land Commission;
 - Support the preparation of a study of agriculture in the region for the purpose of identifying the issues and needs (both immediate and future) of the agricultural sector;
 - Encourage and support value-added agricultural industries; and
 - Enhance opportunities for agricultural activity on lands not in the ALR.

Attachment 9
Regional Growth Strategy Goal 8 – Food Security
(Page 1 of 3)

Goal 8 - Food Security - Protect and enhance the capacity of the region to produce and process food.

Most of the food we eat comes from other parts of the world. A study conducted by the Region of Waterloo Public Health in Ontario (M. Xuereb, 2005) found that *'Imports of 58 commonly eaten foods travel an average of 4,497 km to Waterloo Region'*. Although there are currently no regionally specific studies estimating the distance food travels to reach our plates, it is safe to estimate that many of the foods we regularly consume travel on average at least 2,400 km to reach us (a widely quoted figure for North America, based on research conducted in Iowa by R. Pirog, et al 2001).

Despite ongoing debate about the environmental benefits of 'buying local' food versus making dietary changes (C. Weber and H. Scott Matthews, 2008), it is clear that our dependence on imported foods means that our access to food is vulnerable to the effects of weather and political events that may occur thousands of kilometers away. As well, world energy prices play a large role in the cost of food production and distribution. Greater food security means that more food is grown locally and therefore is not as susceptible to events occurring outside the region.

Local food production generates numerous economic, environmental and social benefits. Agriculture employs almost 3,000 people and generates a flow of income into the region. Local sources of food help reduce the region's carbon footprint by reducing transportation-related GHG emissions. In addition, the nutritional content of locally produced food is often greater than imported food – providing a healthier choice of food for residents.

Ensuring the long-term viability of farming and agricultural activity in the region requires a coordinated effort on the part of local, provincial and federal authorities. In addition to the provisions of Policy 5.4, the RDN and member municipalities can undertake a number of actions to support and enhance the viability of food production in the region as set out in the following policies (See Map 5 – Agricultural Lands).

The '5 A's' of food security:

- *Available – sufficient supply*
- *Accessible – efficient distribution*
- *Adequate – nutritionally adequate and safe*
- *Acceptable – produced under acceptable conditions (e.g. culturally and ecologically sustainable)*
- *Agency – tools are in place to improve food security*

Attachment 9
Regional Growth Strategy Goal 8 – Food Security
(Page 2 of 3)

Protecting the agricultural land base is a key requirement for enhancing food security. The Agricultural Land Reserve (ALR) established by the Province in 1973 has largely been effective in reducing the loss of agricultural lands. Since 1974 the percentage of land protected under the ALR in the RDN has decreased approximately 12%, from 10.10% of the total land base to approximately 8.85% (www.alc.gov.bc.ca/alr/stats).

The majority of ALR lands in the RDN are located in rural Electoral Areas, with smaller portions located within the boundaries of municipalities. This RGS recognizes and supports the jurisdiction of the ALC over all ALR lands and strongly supports the retention and use of all ALR lands for agriculture. The RDN will continue to endorse the Agricultural Land Commission's efforts in preserving agricultural lands. Other actions that would enhance food security in the region include:

- Supporting improved access to sustainable water supplies for irrigation;
- Encouraging best water management practices in agriculture;
- Providing drainage infrastructure for flood-prone lands that do not include environmentally sensitive areas;
- Improving infrastructure to provide agricultural services and processing; and improving access to markets.

Policies

The RDN and member municipalities agree to:

- 8.1 Encourage and support the Agricultural Land Commission in retaining lands within the ALR for agricultural purposes.
- 8.2 Discourage the subdivision of agricultural lands.
- 8.3 Include provisions in their official community plans and zoning bylaws to allow for complementary land uses and activities that support the on-going viability of farming operations.
- 8.4 Establish agriculture as the priority use on land in the ALR.
- 8.5 Minimize the potential impact non-farm land uses may have on farming operations and include policies in their official community plans and zoning bylaws that reduce the opportunity for land use conflicts to occur.

Attachment 9
Regional Growth Strategy Goal 8 – Food Security
(Page 2 of 3)

- 8.6 Encourage and support agricultural activity on lands that are not within the ALR. This may include small-scale home-based agricultural businesses.
- 8.7 Recognize the importance of value-added agricultural uses and complementary land use activities for the economic viability of farms. To support complementary farm uses, official community plans should consider:
- The provision of appropriately located agricultural support services and infrastructure;
 - Reducing impediments to agricultural processing and related land uses;
 - Allowing compatible complementary land use activities (e.g., agri-tourism);
 - Allowing farmers' markets and other outlets that sell local produce to locate in all parts of the community.
- 8.8 Encourage urban agriculture initiatives and support activities and programs that increase awareness of local food production within the region.
- 8.9 Support the appropriate use of water resources for irrigation of agricultural lands.
- 8.10 Support the provision of drainage infrastructure to flood-prone lands that do not lie within environmentally sensitive areas.
- 8.11 Work in collaboration with federal and provincial agencies, adjacent regional districts, and agricultural organizations to improve access to markets for agricultural products.
- 8.12 Support partnerships and collaborate with non-profit groups to enhance the economic viability of farms.
- 8.13 Support farms that produce organic agricultural products and use sustainable farming practices.
- 8.14 Support the production, processing, distribution and sale of locally grown produce (including shellfish).

Attachment 10
Applicant's Submission

Provincial Agricultural Land Commission - Applicant Submission

Application ID: 58437

Application Status: Under LG Review

Applicant: Rhonda Kulai

Local Government: Nanaimo Regional District

Local Government Date of Receipt: 01/01/2019

ALC Date of Receipt: This application has not been submitted to ALC yet.

Proposal Type: Subdivision

Proposal: The purpose of the division, is to develop the land on the Hemer rd side. This property has been in the Taylor family for 4 generations, that being said 2 separate families live on each side. On the hemer side are my son's that have inherited the land from there father, who passed 4 yrs ago. They are still young men and it is my hope and desire to help them develop the land, to sustain them for the future. As well to be able to put a small home there myself. They have been raised there most of there lives, and have no desire to leave.

That being said, the rugg rd side is family as well. The boys Uncle and Aunt who live there are at retirement age and are happy just to be there. So if any improvements are going to be made to the land, borrowing money from a financial institution has to be agreed upon by all owners.

Which if the hemer side to develop the property, it will need to be cleared and prepped which will take money. The boys are financially unable to meet this goal, without borrowing money. It is our desire on both sides to keep the land in the family, but as family grows it will be more and more difficult to make it work, as they will want to leave there side of the land to their children and so on. We only want it in half at the obvious division. There is no intention for the land to be sold on either side. The land is currently divided by a legal clause.

Proposal

1. Enter the total number of lots proposed for your property.

8 ha

6 ha

2. What is the purpose of the proposal?

The purpose of the division, is to develop the land on the Hemer rd side. This property has been in the Taylor family for 4 generations, that being said 2 separate families live on each side. On the hemer side

are my son's that have inherited the land from there father, who passed 4 yrs ago. They are still young men and it is my hope and desire to help them develop the land, to sustain them for the future. As well to be able to put a small home there myself. They have been raised there most of there lives, and have no desire to leave.

That being said, the rugg rd side is family as well. The boys Uncle and Aunt who live there are at retirement age and are happy just to be there. So if any improvements are going to be made to the land, borrowing money from a financial institution has to be agreed upon by all owners.

Which if the hemer side to develop the property, it will need to be cleared and prepped which will take money. The boys are financially unable to meet this goal, without borrowing money. It is our desire on both sides to keep the land in the family, but as family grows it will be more and more difficult to make it work, as they will want to leave there side of the land to their children and so on. We only want it in half at the obvious division. There is no intention for the land to be sold on either side. The land is currently divided by a legal clause.

3. Why do you believe this parcel is suitable for subdivision?

The land is suitable for subdivision as there is a public trail that runs through the property, which used to be a railroad many years ago. This is a natural division as it divides the property approximately in half. The land on the rugg rd side has been mostly taken over by the lake and swamp area. It cannot be accessed from one side to another without going onto public roads or the neighbouring property. As well the parks do not want the trail crossed (attached letter from the parks board)

4. Does the proposal support agriculture in the short or long term? Please explain.

the subdivision will support agriculture in the long term as it will take time and money to prep the land

5. Are you applying for subdivision pursuant to the ALC Homesite Severance Policy? If yes, please submit proof of property ownership prior to December 21, 1972 and proof of continued occupancy in the "Upload Attachments" section.

No

Dear Ms. Taylor:

Re: **1813 Rugg Rd and the Morden Colliery Regional Trail**

As requested, this is to confirm that:

1. the Regional District of Nanaimo has a licence of occupation from the Provincial Crown for PID 008-919-623 (Parcel B (DD 6974N) of Section 14, Range 2, Cedar District) for the purpose of a regional trail known as the Morden Colliery Regional Trail (see attached map);
2. PID 008-919-623 bisects your family's parcel at 1813 Rugg Rd (PID 004-946-855 Section 14, Range 2, Cedar District, except the westerly 60 Acres thereof and except Parcel B (DD 6974n) of said section);
3. under the Regional District of Nanaimo's Park Use Regulation Bylaw 1399, vehicular access to or across the Regional Trail is prohibited; and
4. while you are able to make application to the Regional District for vehicular access across the regional trail lands under the special use provision of Bylaw 1399 (minimum annual fee of \$500), I note that it would be most unlikely that the Region would support such an application.

Sincerely,

Joan Michel
Parks and Trails Coordinator

SUBJECT: Request for Comment on Subdivision and Non-Farm Use in the Agricultural Land Reserve
Application No. PL2019-009
Doumont Road – Electoral Area C
Lot 5, District Lot 35, Wellington District, Plan 3225 Except That Part in Plan 44451

SUMMARY

This is an application for subdivision and non-farm use in the Agricultural Land Reserve (ALR) to allow a second dwelling unit and subdivision of the dwellings into strata lots. The property is approximately 3.2 hectares and is located in Electoral Area C. Should the Agricultural Advisory Committee (AAC) wish to provide comments to the Provincial Agricultural Land Commission (ALC), it may do so by considering the adoption of a motion. Any comments provided by the Committee will be provided to the ALC, along with a copy of this report to assist the ALC in making a decision on this application.

BACKGROUND

The Regional District of Nanaimo (RDN) has received an application for subdivision and non-farm use in the ALR from Glencar Consultants Inc. on behalf of Stephen Wilson. The subject property is located on Doumont Road and is legally described as Lot 5, District Lot 35, Wellington District, Plan 3225 Except That Part in Plan 44451. The subject property is approximately 3.2 hectares in area and is located entirely within the ALR. The property is located between Doumont Road and Brannen Lake and is currently vacant (see Attachments 1 and 2 for Subject Property Map and 2016 Aerial Photo).

The proposal is to construct two dwellings on the property and register each dwelling as a strata lot. Under Section 241 of the *Strata Property Act*, if a strata plan includes buildings that were not previously occupied, the plan may be registered with the Land Title and Survey Authority provided a BC land surveyor certifies that the buildings have not been previously occupied. The applicant's proposed site plan is a sketch which shows the two conceptual building strata lots. It is noted that given the presence of two registered statutory right-of-ways that do not allow the construction of a dwelling, the property could not be subdivided as outlined in this sketch and a strata lot configuration would have to be formalized subsequent to review and approval by the ALC. (see Attachment 3 for Proposed Site Plan).

A copy of the applicant's submission package is included as Attachment 11. Personal information is redacted in accordance with the *Freedom of Information and Protection of Privacy Act*.

Agricultural Advisory Committee members were provided an opportunity to attend the site on February 6, 2019.

REGIONAL GROWTH STRATEGY

The subject property is currently designated 'Resource Land and Open Spaces' pursuant to the "Regional District of Nanaimo Regional Growth Strategy Bylaw No. 1615, 2011" (RGS) (see Attachment 8). The RGS discourages the subdivision of agricultural lands and encourages the ALC to retain lands within the ALR for agricultural purposes (see Attachments 9 and 10).

A copy of the applicant's submission package is included in Attachment 11.

OFFICIAL COMMUNITY PLAN

The subject property is currently designated as 'Rural' pursuant to the "Regional District of Nanaimo East Wellington-Pleasant Valley Official Community Plan Bylaw No. 1055, 1998" (see Attachment 6 and 7). The Rural designation identifies that the creation of parcels having an area less than two hectares by way of subdivision pursuant to the *Strata Property Act* shall not be supported. The Official Community Plan also encourages that all subdivision and non-farm uses within the ALR be compatible with adjacent farm uses and maintain large land holdings to maintain the feasibility for farm use.

The parcel is also designated within both the Hazard Lands and Freshwater and Fish Habitat Development Permit Areas. Both development permit areas would apply to the portion of the property adjacent to Brannan Lake, unless otherwise exempt.

Amendments to "Regional District of Nanaimo East Wellington-Pleasant Valley Official Community Plan Bylaw No. 1055, 1998" are not required.

ZONING

The parcel is currently zoned Agriculture 1 (AG1), Subdivision District 'D', pursuant to "Regional District of Nanaimo Land Use and Subdivision Bylaw No. 500, 1987" (Bylaw 500) (see Attachments 4 and 5 for zoning regulations and minimum parcel size). The AG1 Zone permits farm use, residential use, as well accessory residential and farm uses. The zoning also allows two dwelling units on parcels greater than 2.0 hectares in area. The size of the property is 3.2 hectares as registered with the Land Title and Survey Authority in 1920. The applicant proposes to construct two dwellings units on the property and register each dwelling unit as a strata lot with the Land Title and Survey Authority, as shown on the Proposed Site Plan (see Attachment 3).

Amendments to Bylaw 500 are not required.

BOARD POLICY AND AGRICULTURAL ADVISORY COMMITTEE PROCEDURE

Regional District of Nanaimo "Board Policy B1.8: Review of ALR Applications" (Board Policy B1.8) provides an opportunity for the AAC to review and provide comments on ALR applications

for exclusion, subdivision and non-farm use, on lands within the ALR. Board Policy B1.8 also includes a standing Board resolution for subdivision and non-farm use of lands within the ALR which reads as follows:

As outlined in the Regional Growth Strategy, the Regional District of Nanaimo fully supports the mandate of the Agricultural Land Commission (ALC) and the preservation of land within the Agricultural Land Reserve (ALR) for agricultural use. The Regional District encourages the ALC to only consider subdivision where in the opinion of the ALC the proposal will not negatively impact the agricultural use of the land or adjacent ALR lands.

Policy B1.8 also states that all ALR non-farm use applications are to be forwarded to the Provincial Agricultural Land Commission (ALC) with no resolution of support or opposition from the Regional Board of Directors.

In accordance with the AAC Terms of Reference, the role of the AAC members is to provide local perspective and expertise to advise the Board (and in this case comment to the ALC) on a range of agricultural issues on an ongoing and as needed basis, as directed by the Board. In addition to members' local knowledge and input, comment on ALR applications may be guided by Board approved policies such as the RDN AAC, the Board Strategic Plan, the RGS and the applicable OCP along with the relevant land use bylaws. Members of the AAC can also find information related to ALR land use and agriculture in BC, on the Agricultural Land Commission and Ministry of Agriculture websites. Local and contextual information can also be found on the RDN's agricultural projects website at www.growingourfuture.ca.

Comment provided to the ALC from the AAC is through Committee adoption of a motion. If an AAC member has comments regarding an application being submitted to the ALC, the appropriate time to provide those comments is in the Committee meeting, during discussion on the application, and prior to the Committee's adoption of its motion. Only motions approved by the Committee will be forwarded to the ALC for its consideration. Comments from individual AAC members will not be included in the staff report that is forwarded to the ALC.

The comment provided by the AAC is not an approval or denial of the application and is only a recommendation to the ALC regarding a specific application. As per Board Policy B1.8 any comment from the AAC is provided in addition to the applicable standing Board resolution and Electoral Area Director's comment (if provided). The ALC is the authority for decisions on matters related to the ALR and will consider comments in making its decision on an application.

ELECTORAL AREA DIRECTOR COMMENT

As per Board Policy B1.8, all applications under the *Agriculture Land Commission Act* for exclusion, subdivision, or non-farm use of ALR land are to be forwarded to the applicable subject property's Electoral Area Director, for comment.

With respect to this application, Electoral Area C Director Maureen Young has no comment.

- d) Notwithstanding subsection (c), on a parcel located in this zone and created prior to February 22, 2011 and having an area greater than 2.0 ha. 2
 - 3) Height (non-farm and accessory farm buildings and structures) 9.0 m
 - 4) Parcel coverage
 - a) Non-farm buildings and structures 10%
 - b) Farm or agriculture buildings and structures 25%
 - c) Greenhouses 75%
 - d) In no case shall the combined parcel coverage exceed 75%.
 - e) Notwithstanding a), b), c) and d) above or any other regulation in this Bylaw, the following agricultural structures shall be exempt from maximum parcel coverage:
 - i) Permeable detention ponds
 - ii) Support structures used for shading, frost and wind protection, netting, or trellising.
-

3.4.1.3 Minimum Setback Requirements

- 1) All non-farm buildings and structures – All lot lines 8.0 m
except where:
 - a) the parcel is less than 4000 m² in area then the setback from lot lines may be reduced to 2.0 m from an interior side lot line and to 5.0 m from other lot lines, excluding the front lot line;
 - b) any part of a parcel is adjacent to or contains a watercourse or the sea then the regulations in Sections 3.3.8 and 3.3.9 shall apply.
 - 2) All agriculture or farm buildings, structures and uses – in accordance with Section 3.3.10.
-

3.4.1.4 Other Regulations

- 1) For any part of a parcel in the Agricultural Land Reserve, 'Farm Use' shall be a permitted principal use and for any part of a parcel not located in the Agricultural Land Reserve, 'Agriculture' shall be a permitted principal use.
- 2) Accessory Farm uses are only permitted on that part of a parcel that is within the Agricultural Land Reserve.
- 3) Specific 'Farm' and 'Permitted' uses as defined in the *Agricultural Land Reserve Use, Subdivision, and Procedure Regulation* shall be developed in accordance with Section 3.3.15 and 3.3.16 of this Bylaw.
- 4) Despite any regulation in this Bylaw, land established as "Agricultural Land Reserve" pursuant to the *Agricultural Land Commission Act* is subject to the *Agricultural Land Commission Act* and *Regulations*, and applicable orders of the Land Reserve Commission.

Attachment 6
Official Community Plan Land Use Designation
(Page 1 of 3)

Regional District of Nanaimo
EAST WELLINGTON - PLEASANT VALLEY OFFICIAL COMMUNITY PLAN - BYLAW NO. 1055

Objectives: Resource

- *Support and maintain* the long-term viability of the natural resource land base and *protect* it from activities and land uses, which may diminish its resource value or potential.
- *Encourage* the comprehensive management of the resource land base.
- *Minimize* the impact of resource operations and activities on the natural environment and neighbouring land uses and development.

Policies: Resource¹

Action:

1. Land within the *Resource* designation as shown on Map No. 3 attached to and forming part of this Plan, shall have a minimum parcel size of 50.0 hectares.²
2. On land in the *Resource* designation, residential development shall be limited to one (1) dwelling unit per four (4) hectares, to a maximum of two (2) dwelling units per parcel.
3. Permitted uses within the *Resource* designation shall generally be associated with those activities involving natural resource harvesting or extraction, primary processing and passive recreational uses, including campgrounds. This shall not preclude the Regional District Board from amending the Land Use and Subdivision Bylaw to either include or exclude other uses, which are deemed to be compatible or incompatible with the *Resource* designation.

Development Activated:

5. Where land designated as *Resource* is proposed to be subdivided, the Regional District shall encourage the Approving Officer to give due consideration to the protection of any adjacent forestry and/or agricultural lands, including active and *bona fide* farming operations not located within the Agricultural Land Reserve, by encouraging buffers and subdivision road layout designs which minimize intrusive points of access.

4.2 RURAL

The Rural designation applies to lands with recognized agricultural or forestry value and which are designated as either Agricultural Land Reserve or Forest Land Reserve. These

¹ Bylaw No. 1055.05, adopted December 4, 2018

² Bylaw No. 1055.02 adopted January 24, 2006

Attachment 6
Official Community Plan Land Use Designation
(Page 2 of 3)

Regional District of Nanaimo

EAST WELLINGTON - PLEASANT VALLEY OFFICIAL COMMUNITY PLAN - BYLAW NO. 1055

lands, which account for approximately 29% of the Plan Area's land base (950 hectares), significantly contributes to its predominant rural character by supporting traditional rural activities, large parcels and green spaces. FLR lands designated as Rural are generally in close proximity to lands used primarily for residential purposes and presently do not support intensive processing operations. The Rural designation is intended to protect agricultural and forestry lands and associated operations by relieving development pressures.

Objectives: Rural

- *Support and encourage* agricultural activities on productive agricultural lands.
- *Support* silviculture activities on productive forestry lands.
- *Preserve and enhance* the Plan Area's rural character and environmental quality.

Policies: Rural

Action:

1. Land within the *Rural* designation, as shown on Map No. 3 attached to and forming part of this Plan, shall have a minimum parcel size of 2.0 hectares except those lands that as of the date of this amendment are designated as **Crown Lands** (forest) or where for taxation purposes are designated as **Managed Forest Class** shall have a minimum parcel size of 50.0 hectares.³
2. On land in the *Rural* designation, residential development shall be limited to one (1) dwelling unit per one (1) hectare, to a maximum of two (2) dwelling units per parcel.
3. On land in the *Rural* designation, the creation of parcels having an area less than two (2) hectares by way of subdivision pursuant to the *Condominium Act* (British Columbia), with the exception of subdivision pursuant to the *Bareland Strata Regulations* (British Columbia), shall not be supported.
4. Permitted uses within the *Rural* designation shall generally be limited to traditional rural activities, including those associated with normal agriculture and silviculture practices. Intensive forestry processing uses shall not be supported on lands designated as *Rural* in this Plan.
5. Where land is removed from the Agricultural Land Reserve or the Forest Land Reserve the *Rural* designation shall remain unless redesignated by amendment to this Plan and permitted uses shall be generally be limited to traditional rural activities.

³ Bylaw No. 1055.02 adopted January 24, 2006

Attachment 6
Official Community Plan Land Use Designation
(Page 3 of 3)

Regional District of Nanaimo
EAST WELLINGTON - PLEASANT VALLEY OFFICIAL COMMUNITY PLAN - BYLAW NO. 1055

Development Activated:

6. Where land is within the Agricultural Land Reserve and is proposed for subdivision or non-farm use, including the placement of a second dwelling, approval must first be obtained from the Agricultural Land Commission, except where additional dwellings are necessary for farm purposes subject to the *Agricultural Land Commission Act*. All subdivision and non-farm uses within the ALR shall comply with the agricultural objectives and policies in Section 3.1 - Agriculture of this Plan.

4.3 RURAL RESIDENTIAL

The Rural Residential designation reflects lands characterized by large lots and low population density and which are not within the Agricultural Land Reserve or Forest Land Reserve. Traditional rural activities such as agricultural operations, hobby farms and large-lot residential uses predominate. The Rural Residential designation assists in maintaining the rural character of the community and providing large pockets of green space within the community. Approximately 1000 hectares of land are within the Rural Residential designation, representing approximately 30% of the total Plan Area.

Objectives: Rural Residential

- *Preserve and enhance* the Plan Area's rural character and environmental quality.
- *Support* traditional rural land uses and activities within the Plan Area.
- *Provide* for some flexibility in the form and character of rural subdivision development.

Policies: Rural Residential

Action:

1. Land within a *Rural Residential* designation as shown on Map No. 3, attached to and forming part of this Plan shall have a minimum parcel size of 2.0 hectares.
2. On land in the *Rural Residential* designation, residential development shall be limited to one (1) dwelling unit per one (1) hectare, to a maximum of two (2) dwelling units per parcel.
3. Permitted uses within the *Rural Residential* designation shall generally be limited to traditional rural activities and passive recreation.
4. Notwithstanding Regional District regulations and/or policies related to the maximum number of dwellings per parcel, this Plan recommends that the Land

Attachment 7
Official Community Plan Agriculture Policies
(Page 1 of 2)

Regional District of Nanaimo

EAST WELLINGTON - PLEASANT VALLEY OFFICIAL COMMUNITY PLAN - BYLAW NO. 1055

SECTION 3 - NATURAL RESOURCE MANAGEMENT

The East Wellington - Pleasant Valley Plan Area contains a variety of lands with natural resource value, including those for agriculture, aggregates and forestry. These lands have historically played a significant role in shaping the character of the Plan Area as well as providing important economic benefits. Their long-term viability and productivity is increasingly threatened by urban encroachment and the spread of incompatible uses, necessitating special attention and protective measures. It cannot be overlooked that operations and activities related to these resources can have equally significant consequences on the natural environment and existing residents and development. It is important to achieve a balance.

The policies in this section define the community's intentions and priorities with respect to the long-term management and use of lands with natural resource value. Where stated policies relate to matters beyond the jurisdiction of the Regional District, they are only intended to compliment, guide and assist senior governments in their decision-making processes.

General Objectives:

- *Protect and maintain* the agricultural, forestry and aggregate land base and associated activities.
- *Minimize* the impact of agriculture, forestry and aggregate-related activities on both the natural environment and other land uses and development.
- *Support* sustainable and best management practices for the resource base.
- *Advocate* comprehensive resource management decision-making where resource lands are in conflict with other lands.

3.1 AGRICULTURE

Agriculture plays an integral role in defining the rural character of the Plan Area. Agricultural lands establish limitations on the extent of development, provide buffer areas between established residential areas and represent both a primary and secondary source of income for some Plan Area residents. The Regional District supports and encourages land management practices, which preserve agricultural land and the sustainable production of food.

Approximately 24% of the total area, equating to approximately 790 hectares of land, has been designated Agricultural Land Reserve (ALR) under the provincial *Agricultural Land Commission Act*. The Agricultural Land Commission is one of the main agencies responsible for managing the use and subdivision of ALR lands and, along with the Ministry of Agriculture, is also an important agency for promoting agricultural activities. The ALR's integrity is often threatened at the interface with urbanized development.

Attachment 7
Official Community Plan Agriculture Policies
(Page 2 of 2)

Regional District of Nanaimo
EAST WELLINGTON - PLEASANT VALLEY OFFICIAL COMMUNITY PLAN - BYLAW NO. 1055

Objectives: Agriculture

- *Protect and maintain* the agricultural land resources of the Plan Area for present and future food production.
- *Recognize and protect* the needs and activities of agricultural operations when considering non-agricultural uses on adjacent lands.
- *Encourage* sustainable and environmentally sound farming practices.
- *Ensure* that the availability and quality of water supply is protected and seek ways and means of improving water availability for irrigation purposes.

Policies: Agriculture

Action:

1. Lands within the Agricultural Land Reserve, as well as all other lands considered to be agricultural in character or supportive of agriculture, shall generally be designated as *Rural* in this Plan.
2. Broad-based agricultural activities, including agricultural, livestock and horticultural uses and the processing, production, distribution and sale of locally grown products, shall be encouraged and supported on agricultural lands both within and outside the Agricultural Land Reserve. It is recognized that the regulation of intensive agricultural operations located on land outside the Agricultural Land Reserve, which may be detrimental to the natural environment and surrounding lands, may be necessary.
3. The retention of large land holdings within the Agricultural Land Reserve shall be encouraged to maintain the option and feasibility of farm use.
4. The Regional District shall encourage adjacent land uses to be compatible with existing farm uses and to minimize impacts on agricultural lands.
5. The Regional District shall support the Agricultural Land Commission's mandate of preserving and encouraging the use of agricultural land for agriculture. The Regional District may support the use of agricultural land for non-farm purposes provided that the Agricultural Land Commission first grants permission for the proposed use and the use is compatible with surrounding land use patterns and development.

Attachment 8

Regional Growth Strategy Land Use Designation

Resource Lands and Open Space

The Resource Lands and Open Space land use designation includes:

- Land that is primarily intended for resource uses such as agriculture, forestry, aggregate and other resource development; and
- Land that has been designated for long-term open space uses.test

This designation includes:

- Land in the Agriculture Land Reserve;
- Crown land;
- Land designated for resource management or resource use purposes, including forestry, in official community plans;
- Recognized ecologically sensitive conservation areas;
- Provincial parks;
- Regional parks;
- Large community parks;
- Cemeteries;
- Existing public facilities outside of areas planned for mixed-use centre development;
- Destination Resorts; and
- Golf courses.

Resource activities on land in this designation should be encouraged to operate in ways that do not harm the functioning of natural ecosystems. Land use control, and resource management of lands in this designation is shared between landowners, local, provincial and sometimes federal government. Much of the forest land is privately owned. Forest companies, farmers, shellfish aquaculture (and associated research facilities) and aggregate resource development companies are recognized to have the right to operate on land within this designation in compliance with local, provincial and federal government regulations.

No new parcels that are smaller than the size supported by the official community plan in effect at the date of the adoption of this *Regional Growth Strategy* may be created on land in this designation.

Attachment 9

Regional Growth Strategy Goal 7 – Enhance Economic Resiliency - Agriculture

Agriculture

- 7.14 Recognize the importance of agriculture to the region's economy. To this end, the RDN and member municipalities agree to:
- Support the management of the Agriculture Land Reserve (ALR) by the provincial government;
 - Encourage the provincial government to protect the agricultural land base through the ALR;
 - Support the agricultural use of ALR lands within designated Urban Areas or Rural Village Areas except in instances where urban land uses have already been established at the time of the adoption of this RGS;
 - Recognize that all ALR lands will be subject to the regulations of the Agricultural Land Commission;
 - Support the preparation of a study of agriculture in the region for the purpose of identifying the issues and needs (both immediate and future) of the agricultural sector;
 - Encourage and support value-added agricultural industries; and
 - Enhance opportunities for agricultural activity on lands not in the ALR.

Attachment 10
Regional Growth Strategy Goal 8 – Food Security
(Page 1 of 3)

Goal 8 - Food Security - Protect and enhance the capacity of the region to produce and process food.

Most of the food we eat comes from other parts of the world. A study conducted by the Region of Waterloo Public Health in Ontario (M. Xuereb, 2005) found that *'Imports of 58 commonly eaten foods travel an average of 4,497 km to Waterloo Region'*. Although there are currently no regionally specific studies estimating the distance food travels to reach our plates, it is safe to estimate that many of the foods we regularly consume travel on average at least 2,400 km to reach us (a widely quoted figure for North America, based on research conducted in Iowa by R. Pirog, et al 2001).

Despite ongoing debate about the environmental benefits of 'buying local' food versus making dietary changes (C. Weber and H. Scott Matthews, 2008), it is clear that our dependence on imported foods means that our access to food is vulnerable to the effects of weather and political events that may occur thousands of kilometers away. As well, world energy prices play a large role in the cost of food production and distribution. Greater food security means that more food is grown locally and therefore is not as susceptible to events occurring outside the region.

Local food production generates numerous economic, environmental and social benefits. Agriculture employs almost 3,000 people and generates a flow of income into the region. Local sources of food help reduce the region's carbon footprint by reducing transportation-related GHG emissions. In addition, the nutritional content of locally produced food is often greater than imported food – providing a healthier choice of food for residents.

Ensuring the long-term viability of farming and agricultural activity in the region requires a coordinated effort on the part of local, provincial and federal authorities. In addition to the provisions of Policy 5.4, the RDN and member municipalities can undertake a number of actions to support and enhance the viability of food production in the region as set out in the following policies (See Map 5 – Agricultural Lands).

The '5 A's' of food security:

- *Available – sufficient supply*
- *Accessible – efficient distribution*
- *Adequate – nutritionally adequate and safe*
- *Acceptable – produced under acceptable conditions (e.g. culturally and ecologically sustainable)*
- *Agency – tools are in place to improve food security*

Attachment 10
Regional Growth Strategy Goal 8 – Food Security
(Page 2 of 3)

Protecting the agricultural land base is a key requirement for enhancing food security.

The Agricultural Land Reserve (ALR) established by the Province in 1973 has largely been effective in reducing the loss of agricultural lands. Since 1974 the percentage of land protected under the ALR in the RDN has decreased approximately 12%, from 10.10% of the total land base to approximately 8.85% (www.alc.gov.bc.ca/alr/stats).

The majority of ALR lands in the RDN are located in rural Electoral Areas, with smaller portions located within the boundaries of municipalities. This RGS recognizes and supports the jurisdiction of the ALC over all ALR lands and strongly supports the retention and use of all ALR lands for agriculture. The RDN will continue to endorse the Agricultural Land Commission's efforts in preserving agricultural lands. Other actions that would enhance food security in the region include:

- Supporting improved access to sustainable water supplies for irrigation;
- Encouraging best water management practices in agriculture;
- Providing drainage infrastructure for flood-prone lands that do not include environmentally sensitive areas;
- Improving infrastructure to provide agricultural services and processing; and improving access to markets.

Policies

The RDN and member municipalities agree to:

- 8.1 Encourage and support the Agricultural Land Commission in retaining lands within the ALR for agricultural purposes.
- 8.2 Discourage the subdivision of agricultural lands.
- 8.3 Include provisions in their official community plans and zoning bylaws to allow for complementary land uses and activities that support the on-going viability of farming operations.
- 8.4 Establish agriculture as the priority use on land in the ALR.
- 8.5 Minimize the potential impact non-farm land uses may have on farming operations and include policies in their official community plans and zoning bylaws that reduce the opportunity for land use conflicts to occur.
- 8.6 Encourage and support agricultural activity on lands that are not within the ALR. This may include small-scale home-based agricultural businesses.

Attachment 10
Regional Growth Strategy Goal 8 – Food Security
(Page 3 of 3)

- 8.7 Recognize the importance of value-added agricultural uses and complementary land use activities for the economic viability of farms. To support complementary farm uses, official community plans should consider:
- The provision of appropriately located agricultural support services and infrastructure;
 - Reducing impediments to agricultural processing and related land uses;
 - Allowing compatible complementary land use activities (e.g., agri-tourism);
 - Allowing farmers' markets and other outlets that sell local produce to locate in all parts of the community.
- 8.8 Encourage urban agriculture initiatives and support activities and programs that increase awareness of local food production within the region.
- 8.9 Support the appropriate use of water resources for irrigation of agricultural lands.
- 8.10 Support the provision of drainage infrastructure to flood-prone lands that do not lie within environmentally sensitive areas.
- 8.11 Work in collaboration with federal and provincial agencies, adjacent regional districts, and agricultural organizations to improve access to markets for agricultural products.
- 8.12 Support partnerships and collaborate with non-profit groups to enhance the economic viability of farms.
- 8.13 Support farms that produce organic agricultural products and use sustainable farming practices.
- 8.14 Support the production, processing, distribution and sale of locally grown produce (including shellfish).

LAND CAPABILITY ASSESSMENT

6728 Doumont Road, Nanaimo, BC

1 Introduction

Madrone Environmental Services Ltd. (Madrone) was retained by Mr. Stephen Wilson to conduct a soil survey and land capability assessment of his property at 6728 Doumont Road in Nanaimo, British Columbia.

I understand that Mr. Wilson is hoping to remove an area of approximately 1.53 ha (3.78 acre) area from his property that covers 3.8 ha (9.5 acres)¹. The property – lying between Doumont Road and Brannen Lake – is registered with BC Land Titles under PID 004-187-741. The legal description is "Lot 5 Plan VIP3225, District Lot 35 Wellington Land District 58 Except Plan 44451".

There are no buildings on the lot, which I will call the 'subject property'. The subject property is zoned AL (agricultural land) within the Regional District of Nanaimo and lies within the Agricultural Land Reserve (ALR).

The subject property is transected by two BC Hydro rights of way (Plans 516 and 763). Associated with the BC Hydro transmission line, there is a steel tower that occupies an area of about 15 m by 15 m (and may constrain farm machinery use in the northeastern part of the study area).

¹ Some changes have occurred since the property was first registered in 1925, due to historic changes to the level of Brannen Lake.

MR. STEPHEN WILSON - SHEEPY HOLLOW FARM

PAGE 2

LAND CAPABILITY ASSESSMENT - 6728 DOUMONT RD, NANAIMO, BC

FEBRUARY 13, 2018

In addition there is a buried natural gas pipeline, running from northwest to southeast through the parcel. Any excavation in the vicinity of this pipeline must be vetted with Fortis beforehand. The net area without any constraints is approximately 1.0 ha.

1.1 Land Capability for Agriculture

Land Capability for Agriculture (LCA) ratings are assigned, dependent upon soil and site conditions, according to specific criteria presented in Land Capability Classification for Agriculture in British Columbia (Kenk, 1983). The ratings describe the general suitability of the land for agriculture as seven classes for mineral soil and seven classes for organic soil. Agricultural capability classes are modified into subclasses when limitations to agriculture exist. There are twelve subclasses for mineral soils and nine subclasses for organic soils.

In describing LCA classes, the number refers to the class (1 through 7) and the capital letter refers to the subclass, or nature of the limitation. For example, a Class 3W rating has an agricultural capability of Class 3 (moderate limitations to crop production) related to excess water (W) during the primary growing period that could relay to minor crop damage. Further details are provided in Appendix 4.

2 Description

2.1 Land Use

The property is located along the west edge of the City of Nanaimo and western shore of Brannan Lake. The property dimensions measure 180 m to 280 m from east to west and 160 m from north to south. The western edge of the property is bounded by Doumont Road. The properties to the north and south of the subject property are multiple residence acreage developments used for small-scale (hobby farm) livestock pasturing and small-scale fruit and vegetable production. To the immediate south there is a dedicated public road and a waterfront recreation area for a public campground. Across Doumont Road to the west is a rural holding that was once part of the subject lot. It is not in the ALR.

I understand from the owner that the subject property was only used as seasonal pasture for a small number of neighbourhood animals, mainly horses and some cows. There has never been a house or any farm buildings or structures on the property.

There has been negligible change to land use on the property and surrounding area over the past 14 years, as shown in Appendix 1 showing images from 2002, 2006, 2012 and 2016.

2.2 Review of Existing Maps and Information

2.2.1 Published Soil Mapping

Soils in the Nanaimo area were surveyed at a reconnaissance scale in the 1980's. In this area, soils were mapped as part of the "Soils of Southeast Vancouver Island Duncan-Nanaimo Area at a scale of 1:20,000 (Jungen, et. al., 1989). Subsequently, LCA ratings were calculated and published as a series of maps. This section of the report summarizes the characteristics of the surveyed soils and the LCA ratings for the property. The source maps are based on a reconnaissance level soil survey and air photo interpretation and represent a broad interpretation of soils and agricultural capability².

The broad interpretation of agricultural capability recorded on the 1:20,000 maps does not take precedence over the site-specific assessment in this report.

Existing soil survey maps as per indicate that the property lies within a region containing numerous soil polygons. The soils within the property, from west to east are mapped as follows:

Qualicum: Orthic Dystric Brunisols formed on coarse textured (sand and gravel) deposits of fluvial origin.

Mill Bay: Duric Dystric Brunisols formed on fine marine veneer over gravelly moraine deposits.

Metchosin: Typic Humisol organic deposits greater than 100 cm thick overlying gravelly moraine deposits.

Chemainus: a mix of Brunisolic and Regosolic soils formed on medium textured fluvial deposits

The published LCA ratings for the property are Class 4AT for mineral soils and unrated for organic soils. The mineral soil LCA rating is assigned due to droughty or aridity (A) restrictions during the summer months, related to a combination of insufficient precipitation and low water holding capacity associated with coarse textured soils. Restrictions related to topography (T) are also present on the property, caused by slope gradients exceeding 10 percent.

2.2.2 Surficial Geology Mapping

Halstead (1963) mapped the surficial geology of this area on a coarse scale, which may not be accurate at the local scale and was verified onsite. The maps showed the study area falling in an area mapped as Salish Sediments, which are post-glacial gravel and sand glaciomarine deltaic, shore or upland fluvial deposits.

The elevation in the study area is between 78 m (at the shoreline of the lake) and 85 m above sea level. This is within the elevational range of glaciomarine deposits on eastern Vancouver Island.

A review of well logs in the immediate area showed a range of sediment types, but all consistent with late glacial shoreline or shallow sea environments. Two of the well logs indicated bedrock (of different types!) encountered at 7 and 13 m.

3 Observations

3.1 Topography

In the study area, the topography is very slightly undulating over a gentle east to northeast facing slope. I recorded slope gradients mainly in the 5 to 10% range (corresponding to a Class 2T topographic limitation). Along the western boundary slopes increase to 15-20% (Class 4T). The eastern margin, consisting of a wetland bordering the lake, has a nearly level gradient.

3.2 Soils

I excavated seven pits. In addition I used a Dutch-auger to investigate the soil in the wetland to the east (even though this is outside the study area). The locations of these investigations are shown on Figure 4. Appendix 3 shows the detailed description of the soil profiles.

Soils on the 1.50 ha study area have developed in glaciomarine deposits laid down in or along the margins of the sea at a time when the sea level was up to 90 m higher than its present elevation. Soil textures are dominated by sand and are generally sandy loams or loamy sands. Most soils had high amounts of fine gravel (2-25mm in diameter), which reduce the water-and nutrient holding capacity.

Based on the excavated soil pits and additional auger points I have stratified the study area into three soil map units, as shown on Figure 3. They are summarized in Table 1.

4 Conclusions

Soils in the study area have significant limitations.

The most common and severe limitation in the study area is aridity. All soils in the study area are susceptible to significant soil moisture stress during the growing season. Relatively coarse sandy textures tend to have a low capacity to retain moisture through the dry growing season, but in the study area, these textures are compounded by relatively high volumetric contents of gravel which are typically in the range of 40 to 50%. This means that only 50 to 60% of the soil volume is available to retain moisture and nutrients for plant growth, in Map Units 1 and 2. Unit 3 has virtually no coarse fragments. Irrigation is critical to agriculture on these soils. My analysis shows that Soil Unit 1 has an unimproved Land Capability of Class 4A. Because of the predominance of sand in the soil profile, the best improved rating is 3A.

Map Unit 2 fares worst for aridity. It has a 4A rating, but the best improved rating is, according to the Land Capability Classification is 4A. This soil also has a topographic limitation at the Class 4T level; this cannot be improved.

Although soils in Map Unit 1 and 2 have high coarse fragment contents, the fragments are not deemed to present a significant impediment to cultivation. Most of the fragments are in the fine gravel size fraction (2-25 mm); under the Land Capability Classification only fragments greater than 25 mm are considered to be a hindrance to cultivation. In soil pits 2, 3 and 4, I estimated the coarse gravel content to be 15%, 15% and 25% respectively. These soils carry stoniness limitations at the class 3P, 3P and 4P level. Other soil pits showed no limitation for stoniness. The total coarse fragment content varies over the study area. Based on my sampling I estimate that about 30% of the area in Map Unit 1 have soils with a Class 4P limitation. The remainder is either Class 2P or 2P.

Topography is a Class 4T limitation in Map Unit 2. In addition, due to the high gravel content and sandy texture I consider it to have a fertility limitation at the Class 3F level. This can only be improved through adding organic matter or topsoil. The native soils do not have sufficient nutrient retention ("cation exchange capacity" in soil science terms) to retain nutrients from fertilizers. Beddis and Qualicum soils (Map Units 1 and 2) are also moderately acidic and may require liming to obtain a more favourable pH (depending on the crop).

PAGE 12
FEBRUARY 13, 2018

Of the total 1.50 ha, 1.4 ha or 93% have soils rated as Class 4 under the Land Capability Classification. The most common limitation is aridity or drought. At the time of my assessments the soils were bone dry and subsoils were extremely difficult to excavate, indicating an unfavourable subsoil (Limitation "D").

Unit 1 soils have an unimproved rating of Class 4A, indicating significant limitations due to moisture availability in the latter part of the growing season. This limitation can be improved only to Class 3A through irrigation. Approximately 30% of the area have stoniness limitations at the Class 4P level, so the addition of irrigation would have to be accompanied by stone-removal to achieve in the improvement to 3A. For good growth of deep-rooted crops, deep tilling, subsoiling or ripping will also be required. Unit 2 have a rating of 4AT. This is not practically improvable.

At the time of my assessment – after one of the driest summers on record – soils were dry and the sparse grass cover was stressed. Existing forage condition is poor. Substantial inputs are necessary to improve these soils to a productive condition, above all copious irrigation to overcome the limited water retention of the soils. If that is done, the soils would support a wide range of climatically adapted crops. However, these soils cannot be considered to represent prime agricultural land.

Yours Truly,

6 Limitations

The evaluations contained in this report are based on professional judgment, calculations, and experience. They are inherently imprecise. Soil, agricultural, hydrological, and drainage conditions other than those indicated above may exist on the site. If such conditions are observed, Madrone should be contacted so that this report may be reviewed and amended accordingly.

The recommendations contained in this report pertain only to the site conditions observed by Madrone at the time of the inspection. This report was prepared considering circumstances applying specifically to the client. It is intended only for internal use by the client for the purposes for which it was commissioned and for use by government agencies regulating the specific activities to which it pertains. It is not reasonable for other parties to rely on the observations or conclusions contained herein.

Madrone completed the field survey and prepared the report in a manner consistent with current provincial standards and on par or better than the level of care normally exercised by Professional Agrologists currently practicing in the area under similar conditions and budgetary constraints. Madrone offers no other warranties, either express or implied.

MADRONE ENVIRONMENTAL SERVICES LTD.

APPENDIX 4

Land Capability Classification

The *Land Capability Classification for Agriculture in BC*⁴ classification system determines the general suitability of the land for agricultural use.

The guidebook includes seven classes differentiated on the basis on inherent capability of soils and climate to support common agricultural crops. Land areas are grouped into classes based on similar, relative degrees of limitation for agricultural use.

The intensity of the limitation becomes progressively greater from Class 1 to Class 7, with agricultural capability decreasing from Class 1 to Class 7. Class 1 soils typically support the greatest range of crops and/or require the least amount of management to bring them into production. The lands have slight limitations that restrict its use for the production of common agricultural crops. Conversely, Class 7 soils support the narrowest range of crops (if any), and has no capability for soil bound agriculture or for arable or sustained natural grazing.

In general, the greater the number and/or severity of the limitation(s) to a certain land area, the lower the capability of the land to produce agricultural crops, and hence the higher the soil class. The soil limitations used to determine the class rating are shown with an alphabetic symbol (Table 1), which follows the land capability class; for example, a Class 4A soil is one that suffers moderate limitations due mainly to lack of sufficient soil moisture.

⁴ Kenk, E. and I. Cotic. April, 1983. *Land Capability Classification for Agriculture in British Columbia*. MOE Manual 1. Surveys and Resource Mapping Branch, Ministry of Environment and Soils Branch, Ministry of Agriculture and Food. Kelowna, B.C. 68 pp. ISSN 0821-0640.

MR. STEPHEN WILSON - SHEEPY HOLLOW FARM

PAGE A4-2

LAND CAPABILITY ASSESSMENT - 6728 DOUNMONT RD. NANAIMO, BC

FEBRUARY 13, 2018

Table 1. Description of Land Capability Limitations

Symbol	Land Capability Subclasses for Mineral Soils	General Description
A	Soil Moisture Deficiency	Doughtiness due to poor soil moisture retention
C	Adverse Climate	Thermal limitations due to growing season frost or low temperatures
D	Adverse Soil Structure and/or Low Perviousness	Soils are difficult to cultivate due to firmness or poor trafficability
E	Erosion	Soils have been subject to past erosion
F	Fertility	Soils have high fertilizer requirement
I	Inundation	Soils are flooded part of the year
N	Salinity	Soils have high salt content
P	Stoniness	Soils have high stone content
R	Depth to Bedrock	Soils are shallow over bedrock
T	Topography	Land is sufficiently steep or complex to limit machine use
W	Excess Water	Soils are wet

The classification scheme also recognizes that management inputs may improve a soil, thus changing the capability class. Improved ratings of the land are based on the potential to upgrade the quality of the land, given the applicability of certain management practices. For example, stone removal may alleviate a stoniness limitation such that the land capability class is changed from a 4P to 3P. Where the limitation is aridity, irrigation water is assumed to be available. Other types of improvement techniques include; drainage, stone removal, fertilization, dyking, salinity alleviation, sub-soiling and the addition of soil amendments. As each site is unique, the extent to which these improvements can increase the land capability is determined from site specific evaluations, as well as past experience with improving comparable soils.

Other factors, including distance to market, available transportation facilities, location, farm size, type of ownership, cultural patterns, skill or resources of individual operators, and hazard of crop damage by storms, are not considered in this classification. Furthermore does not include capability of lands for trees, ornamental plants, recreation, wildlife or other resources.

TAB NO. 7

Part 3 – Land Use Regulations

Section 3.4.1

AGRICULTURE 1¹

AG1

3.4.1.1 Permitted Uses and Minimum Site Area

Permitted Principal Uses	Required Site Area with:		
	Community Water & Sewer System	Community Water System	No Community Services
a) Agriculture	n/a	n/a	n/a
b) Aquaculture	5000 m ²	5000 m ²	5000 m ²
c) Residential Use	n/a	n/a	n/a
d) Silviculture	n/a	n/a	n/a

Permitted Accessory Uses

- a) Agri-tourism Accommodation
- b) Home Based Business

3.4.1.2 Maximum Number and Size of Buildings and Structures

Agri-tourism accommodation cabins	combined floor area of 500 m ²
Accessory buildings	combined floor area of 400 m ²
Dwelling units/parcel	
iii) on a parcel having an area of 2.0 ha or less	1
ii) on a parcel having an area of 2.0 ha or more	2
Height	9.0 m
Parcel coverage	25%

3.4.1.3 Minimum Setback Requirements

Buildings and structures for housing livestock or for storing manure	
All lot lines	30.0 m
All other buildings and structures	
All lot lines	8.0 m

3.4.1.4 Other Requirements

Agri-tourism accommodation shall be developed in accordance with Section 3.3.15 of "Regional District of Nanaimo Land Use and Subdivision Bylaw No. 500, 1987."

Despite any regulation in this Bylaw, land established as "Agricultural Land Reserve" pursuant to the *Agricultural Land Reserve Act* is subject to the *Agricultural Land Reserve Act* and *Regulations*, and applicable orders of the Land Reserve Commission.

LAND TITLE OFFICE

exclusion

Dear Sir:

Re: Application #02-S-81-14120
Lot 5, Plan 3225, District Lot 35, Wellington District

In reply to your letter of 26 November 1984 regarding the above, this is to advise that the Commission's suggestion as made in its letter of 26 October 1982 is not a mandatory requirement of exclusion.

To reiterate, the suggestion to subdivide the excluded area was made in order to simplify future administrative dealings concerning the land in question. However, as per your request, the Commission will issue a Certificate of Order certifying the exclusion of that part of the property lying east of Dount Road. A copy of this Order is attached for your information. west *

May I remind you that although the area east of the road has been excluded from the ALR, the total parcel (i.e. Lot 5, Plan 3225) is still subject to the Agricultural Land Commission Act and the charge of the Act will remain on the title.

Should you wish to legally subdivide the land sometime in the future, please advise and proceed as outlined in our letter of 26 October 1982.

I
R
M
Yours truly,
PROVINCIAL AGRICULTURAL LAND COMMISSION

Per: M. F. Clarke, Chairman

CERTIFICATE OF ORDER OF THE PROVINCIAL AGRICULTURAL LAND COMMISSION PURSUANT
TO THE AGRICULTURAL LAND COMMISSION ACT

Re: That part of Lot 5, District Lot 35, Wellington District, Plan 3225,
lying West of Doumont Road, hereinafter referred to as the "land".

WHEREAS the land is included within the Agricultural Land Reserve Plan of the
Regional District of Nanaimo as designated by the Provincial Agricultural Land
Commission on the 5th day of July 1974;

AND WHEREAS Section 12(1) of the Agricultural Land Commission Act provides for
a person to apply to the Commission to have the land excluded from the Agricul-
tural Land Reserve;

AND WHEREAS the owner of the land has applied under Section 12(1) of the
Agricultural Land Commission Act for the exclusion of the lands from the
designated Agricultural Land Reserve;

NOW THEREFORE I hereby certify that the Provincial Agricultural Land Commission
by Resolution #1954/82 dated the 5th day of October 1982 approved an Order
under Section 12(2) of the Agricultural Land Commission Act, allowing the
exclusion of a portion of the land as shown hatched on the attached map marked
Schedule "A", and thereby amending the Agricultural Land Reserve Plan of the
Regional District of Nanaimo.

Dated at Burnaby, British Columbia this 30th day of November 1984.

Re: Application #02-S-81-14120
Lot 5, Plan 3225, District Lot 35,
Wellington District

Please be advised that an error has been noted in our letter of 30 November 1984. Reference to the excluded area should read the area lying "west" of Doumont Road and not "east" as noted.

We apologize for the error and trust you have not been unduly inconvenienced in any way. In any event, the title for the property will still have the charge of the Agricultural Land Commission Act as the excluded area is not a legal parcel of land.

Yours truly

AGRICULTURAL LAND COMMISSION

REMAINDER LOT 5, PLAN 3225, DISTRICT LOT 35, WELLINGTON DISTRICT

A report to accompany an application to subdivide
land in the ALR

Compiled by: Glencar Consultants Inc.
Nanaimo, BC

INTRODUCTION

The purpose of this report is to provide background information re an application to subdivide the remainder of Lot 5, Plan 3225, District Lot 35, Wellington District within the boundaries of the Agricultural Land Reserve. It also provides reasons for making the application.

The intent is to subdivide the property as zoned by the Regional District of Nanaimo into 2 strata lots, each lot being a residence. The remainder would be common property and/or limited common property. A development plan is not included as the positioning of each house would not be considered until the ALC has decided on this application. General locations would be one residence in the southerly portion, the other in the northerly portion.

The original survey of lot 5, Plan 3225, was registered on November 6/25. At that time the portion of lot 5 east of Dumont Road was in excess of 9 acres. Since then the boundary of Brannen Lake has changed and the upland portion of lot 5 is now only about 3.78 acres.

A portion of the Upland is also covered by the main BC Hydro transmission line for Vancouver Island and the main distribution line for natural gas. There is also the Riparian Area for Brannen Lake. These further reduce the agricultural potential of the site to about 2.5 acres.

The site has always been vacant but one residence can be built on it. It is inevitable that construction of a residence and the associated improvements (well, septic field, outbuildings, driveway, landscaping) would split the site into various segments which could not be used for agriculture. This makes a small site even less useable for agriculture.

The site has no agricultural history since 1925 other than very limited use as a seasonal pasture for a small number of neighbourhood animals with the extent of use dependent on the weather. This seasonal use kept the vegetation down.

The application would retain the property in the ALR so that the ALC would retain a say over any future proposed changes which might affect operating agricultural uses in the area.

SITE DESCRIPTION

LEGAL DESCRIPTION

- Remainder lot 5, Plan 3225, District Lot 35, Wellington District.

LOCATION

- West of the City of Nanaimo and adjacent to the west boundary of Brannen Lake. See photo in Tab No. 1. In electoral area C of the Nanaimo Regional District.

AREA

- There is a difference between the area of the subject property as shown on Plan 3225 and the actual physically useable area of the site.

The original subdivision of the property, Plan 3225, was registered on November 16, 1925 (see Tab No. 2). It identified the boundaries of Brannen Lake and Dumont Road at the time. The area between Dumont Road and the lake appears to be in excess of 9 acres and is shown outlined in red. The BC Assessment Authority uses an area of 9.575 acres.

Since 1925 the location of Dumont Road has not changed but the boundary of Brannen Lake has changed considerably. The probable reason is the installation of control structures at the lake outlet to control the flow of the Millstone River for fish protection purposes.

Attached in Tab No. 3 is an air photo showing the present situation. There has been a significant change in the lake boundary and adjacent Riparian Area since 1925. The approximate location of the lake boundary is indicated by a dotted line.

To confirm the area of the remaining upland portion of the site, field measurements were taken by a BC Land Surveyor with the results shown in Tab No. 4. Of the original 9.575 acres only 3.78 acres is not part of Brannen Lake. Of this upland portion 3.06 acres is cleared and .72 acres is treed.

From a physical perspective the actual size of the subject property is 3.78 acres. The remaining 5.80 acres is considered to be permanently part of Brannen Lake.

TOPOGRAPHY

- Downhill slope from Dumont Road towards Brannen Lake

PHYSICAL FEATURES

- The site is bisected by 2 BC Hydro right of ways (plans 516 and 763) and a natural gas right of way (plan 57625). The Hydro right of ways contain the main transmission line for Vancouver Island with one steel tower being located onsite. The natural gas main is the main distribution line for Vancouver Island. Within these rights of ways is the Riparian Area for Brannen lake.

Taking a big picture look at the site the portion of the property not covered by any features is shown cross hatched on the map in Tab No. 5. It is approx. 2.5 Ac in size.

REGULATORY DATA

AGRICULTURAL LAND RESERVE (ALR)

- The subject property is within the ALR (see map in Tab No. 6). Properties to the north and south are in the ALR; properties to the east and west are not.

ZONING

- Reflecting it's location in the ALR the property is zoned Agricultural 1D. Minimum lot size for subdivision purposes (subject to ALC approval) is 2 hectares (5 acres) and parcels over 2 hectares are allowed 2 dwelling units (see data in tab No. 7).

SITE HISTORY

ALR APPLICATIONS

- In 1984 the portion of lot 5 west of Dumont Road was excluded from the ALR (see Tab No. 8).

OWNERSHIP

- In 1981 Armand Caillet acquired lot 5 (see title search in Tab No. 9).
- In 1986 the portion of lot 5 west of Dumont Road was subdivided into 4 lots (see Tab No. 10) leaving the subject site as the remainder of lot 5.
- In 1987 title to the remainder of lot 5 was transferred to Diane Caillet and Stephen Wilson. See title search in Tab No. 11.

3

- In 2010 title was transferred to Stephen Wilson subsequent to Diane Caillet's death. See title search in Tab No. 12.

Title to the property has remained in the Caillet family and/or a relative since 1981.

USE

- The site has been vacant since 1925 and has always stood on it's own. It had a very limited farm use as a seasonal pasture for a small number of neighbourhood animals with the extent of use dependent on the weather. This limited use kept the vegetation down. It did not produce a forage crop. There has never been a residence constructed on it.

While the subject property has been in the ALR since 1972 no applications have been made to the ALC to the best of our knowledge.

ADJACENT LAND USES

North – Mainly cleared rural property with a residence; fields and an unmaintained small orchard. In the ALR.

East – Brannen Lake.

South—Dedicated public road; smaller, mainly treed rural holding with a residence; then a rural residential holding and a waterfront recreation area for a public campground. This recreational area contains the same hydro and gas right of ways contained in the subject property. In the ALR.

West – Rural holding which was once part of the subject lot 5. Not in the ALR.

AREA FARMING HISTORY

While there is no farm history to the east and west of the subject property there has been/still are some farm operations to the north and southeast. The operations to the north are smaller scale rural holdings --- usually split by Dumont Road. Some cleared lands are used for livestock pasturing and some small-scale fruit and vegetable production. Most of the active operations are owned and operated by older families with a long history in the area. This area to the north of the subject property is slowly but surely

4

being transformed into a rural residential area as the older families move on. Farm operations have decreased since implementation of the ALR with some reasons being:

- The smaller size of the parcels.
- Soil limitations involving costly improvements.
- Raw land costs for smaller rural holdings close to the City of Nanaimo have increased to the point that agricultural use is no longer viable for purchasers. This increase in raw land costs reflects a shortage of developable land in the Nanaimo area.

The farm operations to the southeast are mainly large, flat properties at the head of the Millstone Valley used for hay production and pasture. Some areas experience seasonal flooding.

SOILS REPORT

In October, 2017 Madrone Environmental Consultants conducted a soil survey and land capability assessment of the subject property. A copy is contained in Tab No. 13.

THE APPLICATION

The original intent was to submit an application to exclude the subject property from the ALR. However considering the ALC's past reluctance to exclude lands in this area this application is to develop the property under the existing zoning. More specifically, the application is to construct two residences on the site which would be strata titled. Note that one residence is already allowed regardless of this application.

REASONS FOR MAKING THE APPLICATION

PARCEL SIZE AND SITE LIMITATIONS

- As explained previously the upland portion of the site totals 3.78 acres. However this portion contains the main BC Hydro transmission line with one steel tower located onsite. It also contains the main distribution natural gas main for Vancouver Island. Adjacent to Brannen Lake is also a Riparian Area which needs to be protected. This leaves an approx. 2.5 acre parcel unaffected.

5

- However in addition to the preceding the site is vacant but one residence can be built on it. This means that space has to be allocated on the unaffected portion for a:

- residence
- driveway to the residence
- septic field
- well
- outbuilding (storage, parking, etc)
- landscaping

- It is inevitable that construction of a residence and associated improvements will split the site into various segments, portions of which could not be used for agriculture (well, septic field, etc). This would make a small site even less useable for agriculture.

In this particular case we feel that the small useable size of the parcel combined with the site constraints (Hydro line, gas line, riparian area and future residence) limit the agricultural use of the site to the point the site could best be used for rural residential use as zoned(2 residences) without it being excluded from the ALR. In this situation the ALC retains a say over any future proposed changes which might affect operating agricultural uses in the area.

COMPATIBILITY

- The proposed use is compatible with existing uses in the area, including ALR sites. It would not impact on existing agricultural uses in the area.

PRECEDENT

- The proposed use would not set a precedent for the area. In this particular case the site size and constraints affect the subject property much more severely than other properties in the area.

SITE HISTORY

- The site has no agricultural history since 1925 other than very limited use as a seasonal pasture for a small number of neighbourhood animals with the extent of use dependent on the weather. This seasonal use kept the vegetation down.

EXISTING REGULATIONS

- The proposed use is consistent with existing regulations. It does however require approval from the ALC for the second residence.

IMPACT

- The use is consistent with small parcels immediately adjacent to the south of the site which are in the ALR and do not impact agriculture in the area.

ALC Application Outcomes - February 2014 to Feb 2019

AAC has been providing comment on applications to the Provincial ALC in accordance with RDN Board Policy B1 since February 2014. For information on recent and archived ALC applications and decisions, visit the ALC webpage at <https://www.alc.gov.bc.ca/alc/content/applications-and-decisions>. The applications, AAC comment and ALC decisions are summarized in the following table:

Application No	Application Type	Property Legal/Civic Address	Electoral Area	AAC Recommendation	ALC File No	ALC Decision
PL2014-005	ALC Inclusion / Exclusion	0848214 BC Ltd	H	None provided	53673	Approved
PL2014-010	Subdivision	2455 Holden Corso Road & 1617 Rugg Road	A	Approval	53680	Refused
PL2014-013	Subdivision	531, 533, 539 Parker Road West	G	None provided	53681	Refused
PL2014-017	Subdivision	2670 McLean's Road	C	Approval	54215	Refused
