

**VANCOUVER ISLAND
SAFE TECH ALLIANCE**

“YES to technology, but not at any cost”

Points of Concern

5G and ionizing radiation are good for heating food,
but....

- 5G wireless radiation - new research findings
- Tight proximity to schools, residents and farms
- World Health Organization: high-powered RF-EMF directly linked to increased cancer rates
- Health Canada guidance based on flawed information from 2015 and has not been updated

5G Safety is Unproven

**ZERO regulatory
protection for nature
& agriculture**

Human Impacts:
brain fog, insomnia, headaches,
heart problems, fatigue,
dizziness, skin rashes and more

THERE'S NO INSURANCE!!

WE'RE WALKING A TIGHTROPE

Insurance companies do not insure harm from radio frequency radiation (RFR). - Special [pollution insurance](#) is required.

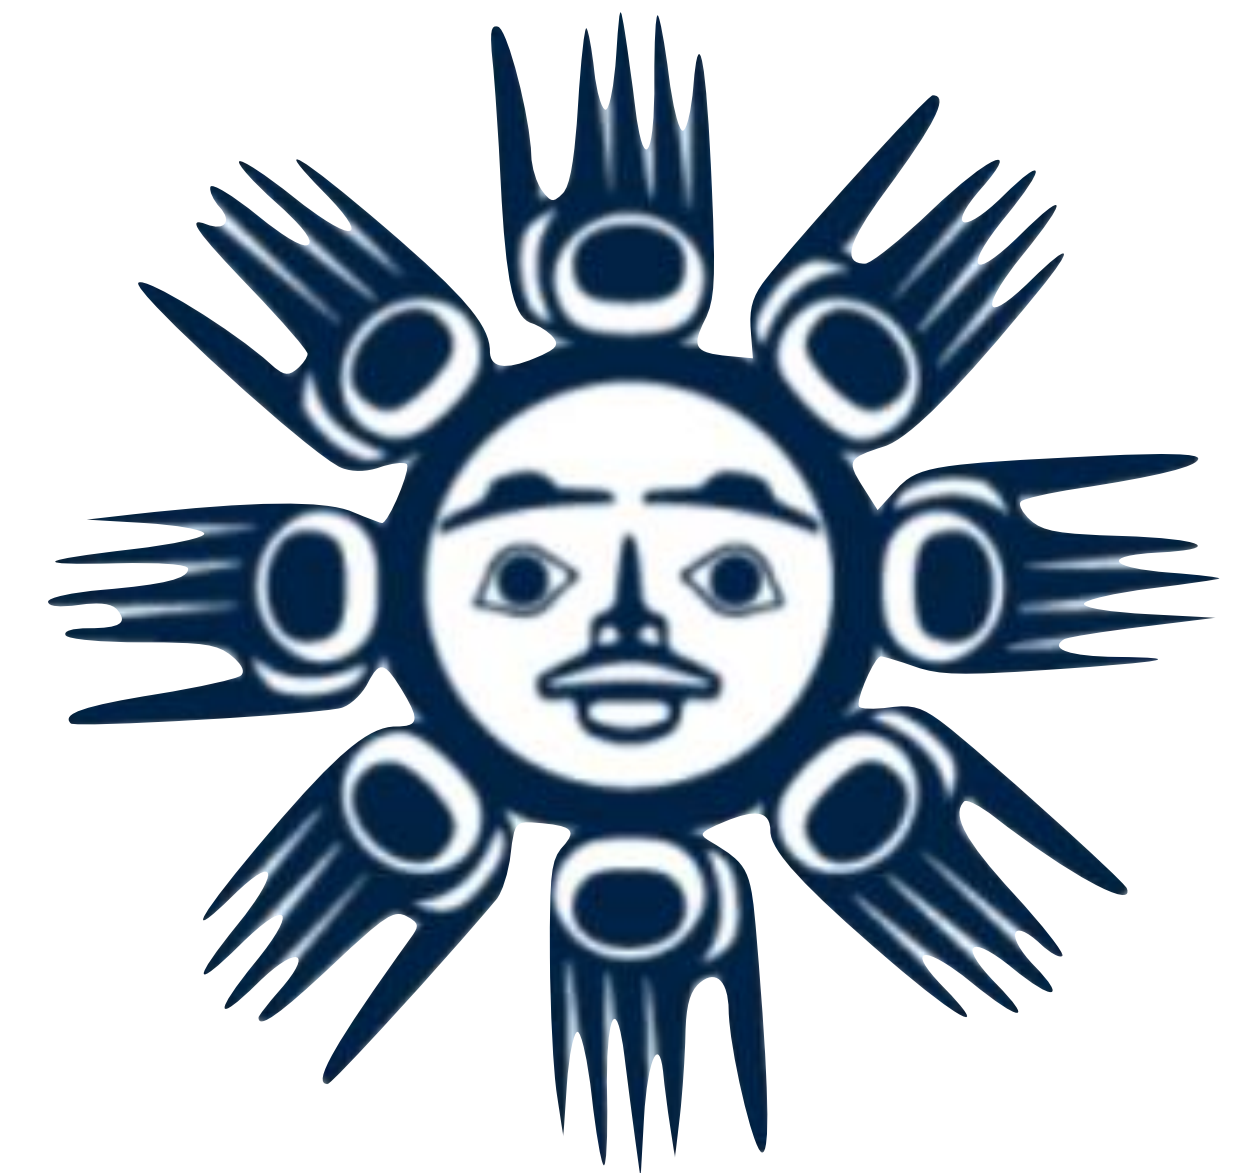

Take Action Now

CONNECTED COAST

Eight handprints around the face represent the circle of community.

The face signifies social connection, and the circular shape is similar to the physical fibre-optic internet cable.

Another Project made possible by ..

Indigenous Services Canada

Connect to Innovate

**A Wired Connection is a
Safer, Faster, and More
Reliable Alternative**

**PROOF
that
RFR is
SAFE**

**INSURANCE
Protection**

NEXT STEP...

Letter of Non-concurrence.
