My main concern is that any electrical lighting will be properly hooded so it does not contribute to light pollution in this area which is blessed with many forms of bird and animal life.

Height- Regarding the measurement of the proposed building's height, my understanding is that 75% of the property's corners are significantly lower. Could you please clarify how the overall height is determined in this case (for the proposed buildings including the four-plex unit up top)? Land Size/Proportions- The property consists of two sections, upper and lower. In order to accommodate the four-plex unit, the upper portion of the land needs to be expanded. Given that the available whole property is less than one-quarter acre, how is it feasible to fit the unit in this upper area, considering the current square footage? Considering this is a rural area, will the proposed storage units blend with the overall dynamics and visual appeal of the location? I am concerned about the increased traffic and its impact on the quiet nature of the area. Additionally, the current K-12 bus stop is located directly across from the proposed entrance. What measures will be taken to ensure the safety of the children?

I totally support the zoning amendment and what the applicant has applied for to develop on this parcel of land.
