Re: PL 2025-116 2219 Gomerich Road

I am pleased for the opportunity to support this application. This property has long been actively farmed. With new ownership, the farming activity on this property is thriving and directly supporting our local economy. The proposed construction of a new dwelling unit with a floor area of 274.95m² will provide necessary space for additional family members to live on property and contribute to farming activities. Although the request is non-adhering residential use, the location is not where agricultural activities occur and brings opportunity to increase farm productivity.

Thank you,

Jessica Stanley, PhD
